

Energize Your Upstream Expertise as an EAG Services Senior Executive

Ready to elevate your knowledge of the oil and gas industry?

At EAG Services, you will join a dynamic and growing management consulting firm, playing a pivotal role in our client's success as you refine project execution skills within the upstream oil and gas industry. As an EAG project team member, you will gain advanced knowledge of the upstream energy industry through direct, hands-on responsibilities that have an immediate impact.

Challenging, Hands-on Assignments within Elite Project Teams

From project planning to execution and final sign-off, you will guide our clients through complex transformations leveraging EAG's proven methodology. EAG's small, elite teams place you on the frontline with experts in all sectors of the oil and gas marketplace. As your knowledge and experience advance, so will the challenge and complexity of your assignments. Mentoring from experts with deep consulting and industry knowledge is available at any time, from anywhere, giving you immediate access to experience-based, best practice solutions.

Respected by Clients and Peers

EAG consultants benefit from the advantages of working for a small, team oriented business. E&P companies trust EAG Services to support critical decisions and planning with knowledgeable, unbiased, best practices driven counsel and execution. We have earned a sterling reputation for going beyond simple project management to deliver unparalleled, unbiased expertise. Every day, we work in tandem with our clients to ensure that optimal results are consistently achieved.

EAG Services currently seeks a Senior Manager with upstream energy industry experience to join our team of individuals planning and implementing client solutions, sustaining key relationships and supporting training and business development initiatives.

As a Senior Manager, you can expect to:

- Interact directly with client personnel and executives, representing your individual project and EAG on a daily basis.
- Leverage existing methodologies to provide industry-recognized best practices to our clients.
- Collaborate with client, vendor and EAG team members to identify and document desired functionality, business requirements, supporting processes and/or system procedures.
- Create and monitor project metrics and deliverables.
- Manage all aspects of day-to-day project activities.
- Provide assistance to other EAG teams as needed, fostering a spirit of teamwork across individual project initiatives.
- Support EAG's business development initiatives, including client proposals and presentations, presentations at industry and marketing events, and recruiting new talent to EAG.
- Mentor other EAG team members as they grow through their careers.
- Lead internal EAG training and knowledge sharing activities.
