

ABOUT US

EAG has been working exclusively in the Energy industry since 2003—helping our customers get the most out of technology. We are known for our Upstream and Midstream industry knowledge and expertise with the software applications that are key to managing your business.

VISION

Mergers and Acquisitions are a common life cycle event for Oil and Gas companies. Properly integrating new assets into your suite of applications, as well as your daily business, is an essential part of realizing the benefits which justified the deal. Based on 13 years of collaborating with energy companies to improve processes, implement software and improve data integrity, we have found that both strategic and tactical action plans are essential to successfully integrate new assets into your organization.

APPROACH

DELIVERY

EAG’s team members know the industry and the nuances of different types of transactions. We are there to help you identify and reduce risk, compress your integration timeline and quickly capture deal value.

The services we offer include a pre-closing assessment to determine your integration objectives, to understand the complexity of system integrations, and to plan the change management needed to support your personnel throughout the process. We work with you to classify requirements in terms of Day 1 versus Day 100 needs and beyond. Our project plans take into account each requirement, and we help you execute. Our goal is to minimize the impact on your day-to-day business and preserve business continuity. Contact us to learn how we can help you minimize disruption and maximize return!

OUR INDUSTRY EXPERTISE

AFE Management | Land Management | Division Order | Drilling & Completion Management
Production Management | Oil & Gas Accounting | Inventory Management | Procurement

OUR COMMITMENT

At EAG, our mission is to be your most valued service partner. We provide the knowledge and experience needed to lead your operational improvement initiatives. We measure our success by your success.

We are the trusted, independent business and technology solutions source for the energy industry. EAG Services is an Oil and Gas Management Consulting firm, founded by Elizabeth A. Gerbel in June of 2003. By keeping our focus on specific segments of the energy industry and remaining unbiased in our approach, EAG delivers Solutions That Fit Your Business while providing a challenging and rewarding place to work for our employees. We partner with our clients to provide the industry, application, and business process expertise needed to lead your most challenging initiatives. Emphasizing the need to find and implement the “right” solutions for you ensures your success, and therefore our own.

OUR TEAM

Every day our consultants dig into complex challenges, coming up with creative and practical solutions. We enjoy working in the Oil and Gas business - especially the parts that make our industry unique! We like being the consultants who know Oil & Gas inside out. At EAG, we nurture a culture of comradery and have a healthy pride in our work. We are always motivated to raise the bar when it comes to delivering high quality service.

“We are focused on the unique business requirements of our clients. This allows us to make sound recommendations; to design and deliver what is truly in your best interest versus imposing cookie cutter solutions. We listen and work hard to meet your needs.”

Ahmed Taher, Senior Manager

“An advantage to our clients is that we provide highly qualified professionals, who are intent on delivering results. At every level, our people generate quality work. EAG invests in us, so we are prepared in terms of business knowledge and how to get projects done.”

Orlando de los Santos, Director

“We have the highest level of respect for the people and organizations we work with. We are only successful when you are successful, and we keep that in mind every day.” **Elizabeth Gerbel, CEO**
